

Why choose LED Exchange?

- Instant hydro savings! Save up to 80% of your electricity costs for lighting.
- LED light bulbs last 25,000 hours when used an average of 3 hours a day. This works out to 20 years of usage.
- The estimated cost per year for 15 watt replacement of 100 watt incandescent is \$1.81 for the LED bulb. 100 watt incandescent bulbs are \$12.06 per year.
- Access the Power Smart program through Manitoba Hydro* to upgrade to LED.
- LED bulbs have capacity to withstand extreme hot and cold weather conditions (-40 to +50).
- Environmentally friendly light source, less energy used, no Mercury.
- Bulbs come in a large variety of colors and sizes.

Hydro rates keep going up!
Don't hesitate, upgrade to LED lighting and start saving now.

Ivory Electric is your trusted electrician and lighting expert.

We safely dispose of and recycle your old bulbs.

LED EXCHANGE

A SERVICE PROVIDED BY IVORY ELECTRIC 

“What type of LED bulb is right for you?”

“What does Lumens or Kelvin (K) mean?”

“What size wattage do you need?”

“Frustrated by replacing the same bulbs?”

Our team of professional and courteous employees are here to help you answer these questions and more. We'll come into your home and upgrade your existing lighting to LED for a flat fee.

Contact us today to discuss your LED Exchange.

Ask us about Manitoba Hydro's Power Smart* programs.

These are NOT LED Bulbs.

These bulbs are old compact fluorescent bulbs that contain Mercury and are not safe for the environment.
